

Q-Deck®

BY SEALMARK

QUARTZ COATING SYSTEM

**LUXURIOUS.
LONG-LASTING.
AFFORDABLE.**

Through a unique blend of sophisticated polymers and mineral quartz crystals, Sealmark technology provides customers with an exclusive finish that will stand up to the toughest conditions... while offering a wide range of warm, inviting colors to match your surroundings. Q-DECK is extremely durable, bonds permanently to a variety of substrates (including previously painted surfaces) and does not take second place to any commercial epoxy coating available on the market today!

Consider The Advantages!

SAFETY

No skidding, no slipping, no kidding. The combination of quartz and anti-slip agents assures protection against wear and tear. Every step can be taken with confidence. No more fear of wet surfaces.

FADE RESISTANCE

Our wide selection of inviting colors offers long-lasting colorfast beauty with an optional five-year material warranty.

100% WATERPROOF

Our low VOC (Volatile Organic Compound) polymeric system creates a thermal membrane that stops moisture penetration before it can do collateral damage. Prolongs the life of a wooden deck or substrate with no offensive odors.

HIGHLY STAIN RESISTANT

Most common stains can be removed quickly and easily with warm, soapy water.

ELIMINATES MOLD, ALGAE AND MILDEW

Sealmark's formula contains a biocide that is extremely resistant to the buildup of these unwanted elements.

COST EFFECTIVE

This new durable coating system will *eliminate* the need for staining and waterproofing and add years of life and beauty to any flooring project undertaken.

**The Innovative
Solution for New
Decks, Old Decks
and Concrete
Surfaces!**

AVAILABLE IN THESE BASIC COLORS PLUS A WIDE VARIETY OF COLOR BLENDS

Q-Deck[®]

BY SEALMARK

QUARTZ COATING SYSTEM

**The
Waterproof
Solution!**

Coating Can Be Applied to Old Wooden Decks, Concrete, Ceramic Tile, Composite Wood, Fiberglass Boat Decks and Other Surfaces!

Make the old look brand new! The versatility of this durable product can be applied to patios, garage floors, sound barrier walls, anywhere that requires superior protection from the damaging elements. To discuss any questions you may have about a project, feel free to contact us.

Also Available, Pre-Coated For Easy New Deck Installation

Hidden fasteners allow for a secure, do-it-yourself project like any wooden deck, while leaving a clean, unblemished surface. Eliminates the problem of mushrooming nails and screws, cracks and wood rotting.
